INFINITY AI SYSTEM SECURITY SPECIFICATION
Document ID: SEC-2026-v4
Authorized Device: Laptop Host Hardware

Section 1: USB Authorization Key
The USB device functions strictly as an offline authorization key containing .infinity-ai-authorized.
Local databases and conversation logs are never stored on the USB drive.
The security cipher used for workspace credentials is AES-256-GCM.

Section 2: Vector Store and Indexing
Infinity AI employs local ChromaDB storage located at D:\PrivateAI\app\chroma_db.
Document chunks are extracted using sliding window size 500 with overlap 80.
Embeddings are computed completely offline on the host machine using all-MiniLM-L6-v2.
